User Manual Sample

Getting Started Guide

1. Introduction

Welcome to the Automation Documentation Agent! This guide will help you get started with automating your documentation workflow.

2. Prerequisites

Before you begin, ensure you have:
â¢ A Telegram account
â¢ Access to the Automation Documentation Bot
â¢ PDF, DOCX, or Markdown files to process
â¢ Notion workspace access
â¢ GitHub repository access

3. Getting Started

3.1 Find the Bot
Search for @AutomationDocsBot in Telegram

3.2 Start a Conversation
Send /start to begin using the bot

3.3 Available Commands
/brainstorm - Start brainstorming session
/generate - Generate new documentation
/query - Ask questions about documents
/help - Get help and command list

4. Using the Bot

4.1 Brainstorming Mode
Use /brainstorm followed by your topic
Example: /brainstorm API documentation

4.2 Document Generation
Use /generate followed by requirements
Upload reference documents if needed

4.3 Query Mode
Use /query to ask questions
Upload relevant documents for context

5. File Uploads

Supported formats:
â¢ PDF files (up to 10MB)
â¢ Word documents (.docx, up to 10MB)
â¢ Markdown files (.md, up to 5MB)
â¢ Text files (.txt, up to 5MB)

6. Best Practices
